VENOUS 2020 Day of Science: Beyond Hemodynamics

On behalf of the American Venous Forum, we invite you to join us for the VENOUS 2020 Day of Science to be held on March 3, 2020.

The 5th Edition of this meeting continues as an all-inclusive (both CME and non-CME) forum for scientific exchange among MDs, PhDs, allied health professionals, and all other folks trained to think about new ways of understanding, diagnosing and treating venous and lymphatic disease.

This course is ideal for professionals from throughout the healthcare system including:

- Practicing Physicians
- Academic Physicians
- Academic Researchers
- R & D Leadership, Researchers and Medical/Clinical Trial Divisions of Venous Companies
- Representatives from NIH, FDA & CMS
- Clinical Research Organizations
- Basic Scientists
- Translational Scientists

Course Description

This program has been designed to open a scientific environment to discuss "where we should go" to identify knowledge gaps in the venous and lymphatic field and then explore potential ways to solve these problematic deficiencies.

The program structure includes a morning session of abstract presentations and an afternoon session of invited lectures where we will be discussing themes such as: "Our Current Knowledge", "Gaps in the Field" and "The Bridges." We will wrap it all up during "The Future" session highlighted by presentations from our most recent AVF-JOBST Research Grant awardees.
